Technical note N°1/2017

Due to recent failures and availability of updated technology, the RC44 Class Association has decided to permit the optional use of Harken 3T Aluminium V Block (Harken reference 3295AL) for the backstay, on any event following the publication date of this Technical Note.

The above permission will become part of the RC44 Class Rules 2017 and Appendix H will be amended as follows:

Where it says:

Backstay		
Custom	2	High load sheave in custom aluminium casing or 75mm Black Magic Single Loop Block H3230

It shall now say:

Backstay		
Custom	2	High load sheave in custom aluminium casing or 75mm Black Magic Single Loop Block H3230 or 3T Aluminium V Block H3295AL

The use of the high load sheave in custom aluminium casing produced by Pauger will be removed from the RC44 Class Rule in 2018.
